

MediLab Nexus Quick Start

Purpose

This guide is for staff who need the shortest possible introduction before they start using MediLab Nexus.

Start Here

1. Open the hosted MediLab Nexus web link or the Windows desktop app.
2. Sign in with your username and PIN.
3. Confirm you are in the correct portal for your role.
4. Start from Dashboard to check current workload.

Screenshot placeholder: sign-in screen.

Core Daily Flow

1. Register or find the patient.
2. Confirm the patient's Trace Code.
3. Attach the correct service or request.
4. Move the patient through the required workflow.
5. Record payments, expenses, or updates at the time they happen.
6. Preview or print finalized documents only after the responsible user completes them.

Pages You Will Use Most

- Dashboard: shift overview and urgent items.
- Patients: registration and intake.
- Patient Records: history, record lookup, reprints.
- Sonography Worklist: scan-room activity and status changes.
- Scan Reports: reporting, preview, and release.
- Expenses: daily operating costs and refunds.
- Operations Report: finance and operational review.
- Alerts: internal bell and notification monitoring.
- Settings: facility profile and backups for authorized users.

Rules Staff Must Remember

- Always search before registering a new patient.
- Always confirm the Trace Code.
- Do not release unfinished reports.
- Do not share user accounts.
- Change temporary or recovered PINs immediately.
- Record payments and expenses on the same day.

If Something Goes Wrong

- Sign-in problem: ask an admin to recover or unlock your account.
- Print problem: allow pop-ups and try again.
- Missing patient: search by Trace Code first.
- Wrong role or missing menu: contact an admin to review your account permissions.
