

MediLab Nexus Screenshot Checklist

Purpose

Use this checklist to capture production-ready screenshots and drop them into the manuals later.

Capture Rules

- Use real UI labels but avoid exposing real patient-identifying data.
- Prefer test or anonymized records.
- Use consistent browser zoom and window size.
- Capture clean screens without unrelated pop-ups.
- Show the active page header and the key action area.

Core Screenshots

- Sign-in screen
- Register first admin flow
- Dashboard
- Patients registration form
- Patient Records search and history view
- Orders & Requests form
- Sonography Worklist
- Scan Reports editor
- Printable report preview
- Expenses page
- Services page
- Operations Report summary
- Alerts page
- User Management page
- Settings page
- Audit Logs page

Role-Specific Screenshots

- Receptionist portal home
- Sonographer portal home
- Doctor reporting view
- Manager dashboard and operations report
- Admin system controls

Recommended Manual Placement

- [USER MANUAL.md](#): use one screenshot near each major section.
- [QUICK START.md](#): use sign-in and dashboard screenshots.
- [ROLE GUIDE RECEPTION.md](#): use intake and report pickup screenshots.
- [ROLE GUIDE SONOGRAPHER.md](#): use sonography queue screenshots.
- [ROLE GUIDE DOCTOR.md](#): use reporting editor and preview screenshots.
- [ROLE GUIDE MANAGER.md](#): use operations report and dashboard screenshots.
- [ROLE GUIDE ADMIN.md](#): use user management, alerts, settings, and audit screenshots.
